

Diversity and equality statement: January 2025

Communicate 2U aims to work with partners across health and social care to create a healthcare environment and workforce that are accessible, respectful and responsive to everybody, irrespective of their disability, communication style or other characteristics.

We can only achieve this with a team that is sensitive, passionate and prepared to disrupt the cultural barriers that the most vulnerable in our society face. Our team welcomes anyone - irrespective of race, sex or disability - to join us on this journey.

Moreover, we are committed to hear the voices of those who have experienced these barriers to health and social care services, with at least one person with such experience represented on our Board of Directors.
